

Glycemic Control Workshop 3

October 8, 2019

8:30 am-12:30 pm

Virginia Mason - Lindeman Pavilion

1201 Terry Ave, Seattle, WA - 1st Floor - Volney Auditorium

Course Description: The three-part workshop series is designed for inpatient and ambulatory nurses caring for patients with type 1, 2 and 3c diabetes mellitus. The **first workshop** will cover pathophysiology, long-term complications of diabetes, management of hypoglycemia and hyperglycemia, blood glucose monitoring, and insulin administration. The **second workshop** will primarily focus on the pharmacotherapy of diabetes and patient education resources. The **third workshop** will include glucose monitoring, dietary management, and discussion of case studies to tie all three workshops together. Attendance at the entire workshop series will provide the information needed for the full range of glycemic control. Content will be applicable to inpatient and ambulatory nurses.

Workshop 3 Objectives:

- Discuss carb counting method for diabetes management and how it effects insulin dosing.
- Explain basic operation and management of continuous glucose monitors
- Explain basic operation and management of insulin pumps.
- Identify two measures of success in glycemic control for patients with diabetes mellitus.
- Demonstrate nursing interventions that will assist the patient with diabetes mellitus to achieve glycemic control.
