Professional Experience – Virginia Mason Medical Center, Seattle WA

Interventional Radiology Nurse

2002 – Present

Provide Nursing care and Moderate Sedation for patients undergoing diagnostic and interventional procedures in IR. Complete admission and discharge for a diverse ambulatory and in-patient population, including detailed procedural and discharge education for the patients and family. Moderate Sedation administration and monitoring for Biopsies, vascular, neurovascular, drains, central lines and catheter placements.

- Teach quarterly 3-hour IR Specifics class (since 2015)
- Designed and implemented drain care boxes for RN discharge teaching available in IR and several inpatient areas
- Wrote standard work and que cards for Ekos system set up
- Participate as an annual validator for Procedural Unit Validations (emphasis is femoral sheath pull)
- Preceptor for new RN's to IR

Dialysis Nurse

1993 – 2002

Inpatient hemodialysis nurse for a 4-bed unit, and remote treatments for Critical Care hemodialysis, CVVH and Peritoneal Dialysis. Collaborated with Nephrologists and Social Service team to implement plans of care for inpatient treatments and coordination with outpatient dialysis facilities.

- Fresenius, Cobe machines and Reverse Osmosis unit set up and sterilization
- Assisted surgery residents with Mahurkar Dialysis Catheter placements
- Represented Dialysis and participated in Nursing Action Forum meetings

Staff Nurse Chest and Infectious Disease

1992 – 1993

New graduate nurse on level 16 providing care using the nursing process to assess, plan, provide interventions and implement plans of care for evening and night shift patients. Early 1990's I cared for many AIDS patients, Guillain Barre, TB and also post-surgical thoracotomy, head and neck and overflow medical-surgical patients.

Student Nurse

1991 – 1992

Mentored by Level 16 staff RN's. Trained in the nursing process, organized work flow, read and implemented orders, passed medications, collaborated with ancillary services to meet patient goals of care, and learned various skills including Chest Tubes, Trach care and suctioning, Foley care and placement, central line management and worked toward confident communication with MD's and other services to optimize patient outcomes.
